

Prof. Rajagopal Raman

Department of Zoology,
University of Delhi

Prof. R. Raman is a Professor in the Department of Zoology, University of Delhi. His research interest is in gut microbiology and vector biology. His group uses insects as a model to understand the role of gut microbial community in their hosts. He proposed that understanding the microbial diversity in insect gut and their critical roles in insect growth and development will offer crucial information for designing future pest management strategies. He is recipient of many awards and distinctions like- National Associateship, Department of Biotechnology, Govt. of India, Scopus Young Scientist Award, 2008. His research work (>50) is published in journals of great scientific repute.
